Public Abstract
Truth Under Oath (TUO) presented as Power of Suggestion Under Oath (POSUO)

TruthUnderOath (TUO) service is a perjury prevention service, a means to detect the most accurate truth under the legal system. It works via Power of Suggestion, Positive thinking, Mind over Body, etc. By saying, "I swear to tell the truth", you now do, while under oath. Similarly, by swearing, "I will be cured of cancer in 1 month", it will be true.

By swearing,
I solemnly swear under oath,
My cancer will go away over the next 3 weeks. At my next checkup in 4 weeks, I will be cured of cancer.

Subscribed and sworn before me _____ dated _____

One cannot sign just anything under oath anymore. Lying is no longer possible under oath now (perjury obsolete), so if a subject can swear their cancer away, then it will happen. The effect can work in front of a notary public, sworn either written or verbal.

Power of suggestion has been shown to work by hypnotists for ages. Power of suggestion, power of prayer, positive thinking, mind over body, hypnosis, and self-hypnosis have been shown to work in studies. This thinking pattern, while under oath, will boost positive results, called POSUO. Placebos may be needed (swallow a pill) to help convince somebody the cure is working.

POSUO connects to God, making wishful thinking more pronounced while under oath, connecting to the spirits to heal the spirit and soul through positive thinking.

Sometimes the greatest solution in life is the simplest. There is little risk yet explosive reward if POSUO can be applied to the medical field. Countless incurable diseases are out there just waiting to be cured with an unusual yet simplistic methodology. POSUO is non-invasive, can be given at a remote location (swearing a statement 1000 miles away can technically work), can be done in third party (sign somebody's else's cancer away). Even easier is the treatment of animals with POSUO, all non-invasive.
